THE SPA REPAIR EXPERTS

NATURE II

Please note that these are general recommendations only

CHEMICALS REQUIRED

Nature II, Shock treatment, Chlorine (lithium hypochlor), test kit, Alkalinity increaser and filter degreaser

START UP

Fit nature II into filter (as per box instructions)

- Add 4 teaspoons of lithium-hypochlorite to spa water (per 1000L)
- Run spa filter for 1/2 hour and test and adjust the ph

BEFORE EACH USE

Add 1 tablespoon of shock

WEEKLY

- Add 3 tablespoons of shock (with cover off) and run spa for 1/2 hour
- Test for and adjust ph and total alkalinity with alkalinity increaser

MONTHLY

- Follow weekly treatment
- Remove and clean filter

4 MONTHLY

- Remove filter and soak in filter degreaser
- Empty and refill spa water, renew Nature II and proceed to "START UP"

Advantage of Nature II: No chemical smell. PH wont vary dramatically

Visit our online shop at shop.brookssparepairs.com.au for all your spa & pool needs
